

How to Use Tiny Term to Transfer a Mfg Price File from your PC to the Tag-n-Trak Unix Server

Overview

This document explains how to use TinyTerm file transfer to transfer a Tag-n-Trak price file from your PC to the Unix Server.

The instructions in this document can be used instead of "Copy file from DOS floppy to Unix" when using Universal Price Updating. (Replace Page 2 of the document "IN 800 Universal Price Update" with this four page document.)

This document assumes you have downloaded/copied the price file attachment from your email to a folder on your PC.

Use TinyTerm File Transfer to Transfer Price File from PC to Unix Server

1. Press <F10> from any Tag-n-Trak menu for the Custom Menu Release 1.0
2. Select **File Copy and File Transfer Menu.**
3. Select **TinyTERM Transfer File from PC System to Unix.**
4. This routine will allow you to transfer a DOS file from a PC system using TinyTERM to the Unix file system.

Please select 9 if you don't want to do this.

1 - Continue

9 - Exit

5. Please enter the file name that you wish to copy from the PC.

The file name should only contain numbers 0 through 9, letters a through z and period. A directory path is not required for the destination if the file is to reside in the /usr/df/datafile/store directory.

Please enter the file name: **filename.tnt** ← **must be lower case!**

Enter Q to Quit and not enter a file name.

Waiting to begin transfer process
rz ready. Type "sz file ..." to your modem program

How to Use Tiny Term to Transfer a Mfg Price File from your PC to the Tag-n-Trak Unix Server

CLICK ON **Tools**.

CLICK ON **Send File**.

The “Send File” box will display. Verify that the File **transfer protocol is ZMODEM**.

Be sure the “**Files to Send**” box is empty. If it is not empty, delete what is there from a previous transfer.

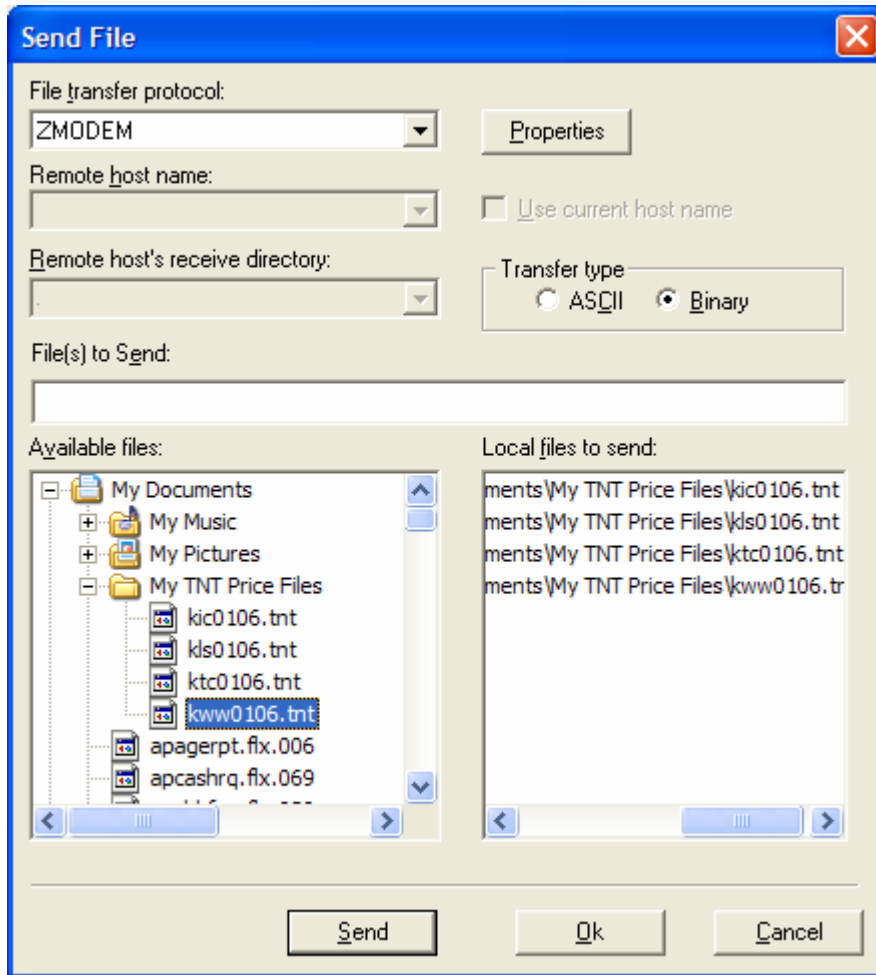

Look for the Tag-n-Trak price file names in the “Available files” box. In the above example, the price files were copied from email to a folder “My TNT Price Files.”

How to Use Tiny Term to Transfer a Mfg Price File from your PC to the Tag-n-Trak Unix Server

Use your mouse to **LEFT CLICK and DRAG** the desired price file from the “Available files” (left side) to the “Local files to send” box on the right.

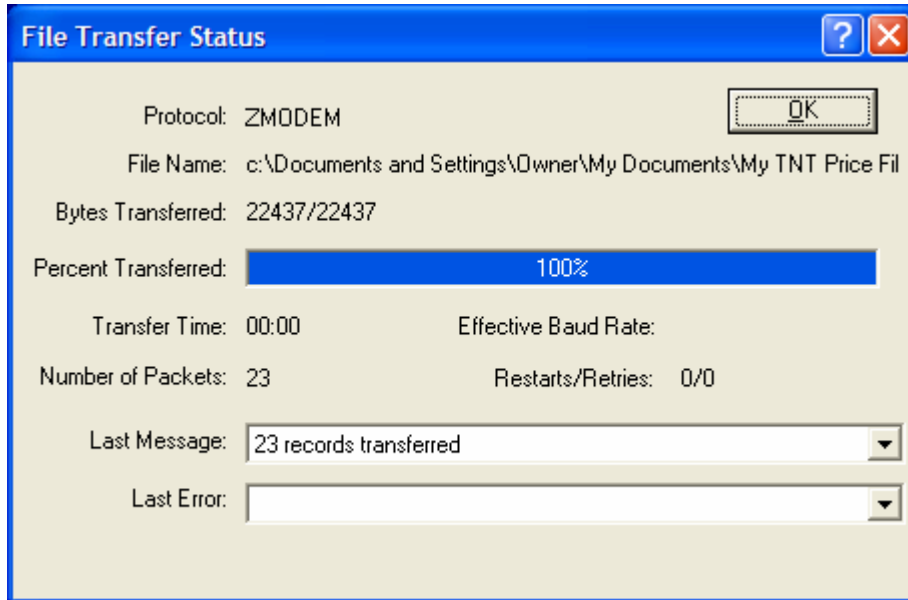

If you have multiple price files to transfer, drag each price file over to “Local files to send.”

CLICK **Send** when ready to begin the transfer.

How to Use Tiny Term to Transfer a Mfg Price File from your PC to the Tag-n-Trak Unix Server

The file transfer is complete when the percent transferred is 100%. Click OK.

After clicking OK, something similar to the following will display:

```
Waiting to begin transfer process ....
rz ready. Type "sz file ..." to your modem program
è**B010000012f4ced
Press Enter for menu ...
```

Press the Enter key to return to the File Transfer menu.

Select X to exit from the File Transfer menu.

Select X to exit from the Custom menu.
